WORK EXPERIENCE

Febula IT | Front-End Developer
MAY 2023- JUN 2024

- Led the development of the Cubby project and lgain plan project, focusing on pixel
- Created new software for client.
- Worked closely with client to collect requirements and ensure project quality
- Implemented user authentication, search functionality, and a report system for ranking answers.
- Handle the Database and created a responsive front-end using HTML, CSS, and JavaScript React Node Express

Mowla Mohammad & Co | Full Stack Developer
Nov 2024- Current

- Designed and developed a small-scale e-commerce site using the MERN stack.
- Built a responsive portfolio website to showcase client offerings.
- Developed APIs to manage product details, user data, and basic site functionalities.
- Created user-friendly and visually appealing interfaces with React.js and Tailwind CSS.

PROJECTS

Social Media Platform   Website Github

Developed a dynamic social media website featuring user authentication, profile management, and interactive functionalities. Key features include

- **User Authentication:** Login, registration, and secure access management.
- Post Creation & Interaction: Users can create posts with images, react to posts, and leave comments.
- **Friendship & Following:** Implemented friend requests, following/unfollowing, and user search.
- **Profile Customization:** Allows users to upload profile and cover photos.
- **Technologies Used:** Built using React.js, Redux, Tailwind CSS, Node.js, Express.js, and MongoDB, adhering to the MERN stack architecture for a seamless and responsive user experience.

E-Commerce Website   Github

Designed and developed a fully functional e-commerce platform offering a seamless shopping experience. Key features include:

- **User Authentication:** Secure login, registration, and account management.
- **Shopping Cart & Wishlist:** Add to cart, wishlist management, and cart updates in real-time
- **Order Management:** Users can place orders, view order history, and track order status.
- **Admin Dashboard:** Includes product inventory management, order tracking, and user management.
- **Technologies Used:** Built with Next Js, Redux, Bootstrap, Node.js, Express.js, and MongoDB for scalable and efficient performance.

School Management System (In Progress)   **Github**

Currently developing a school management dashboard aimed at streamlining administrative processes. Key features include:

- **Product Management:** Dynamic product listings with categories, filters, and detailed product pages.
- **Role-Based Access:** Separate dashboards for administrators, teachers, and students.
- **Academic Management:** Tools for managing classes, timetables, and attendance.
- **Technologies Used:** Leveraging React.js, Node.js, Express.js, and MongoDB.
